

The Kärcher logo is positioned at the top center of the image, featuring the brand name in a bold, white, sans-serif font. It is set against a yellow rectangular background that contrasts with the darker tones of the warehouse scene.

KÄRCHER

The background of the advertisement shows a large industrial warehouse with high ceilings and tall metal shelving units filled with cardboard boxes. A worker in an orange safety vest is operating a Kärcher ride-on floor scrubber in the distance. In the foreground, a close-up of the scrubber's front section is shown, highlighting its large yellow brushes and headlights. The overall scene conveys a sense of industrial efficiency and cleanliness.

PROFESSIONAL | B 260 RI FLOOR SCRUBBER

ACHIEVE EXCEPTIONAL PERFORMANCE FOR TOUGH, INDUSTRIAL CLEANING APPLICATIONS.

The B 260 RI is a heavy-duty ride-on floor scrubber delivering outstanding and consistent cleaning results, ideal for manufacturing, warehousing and transportation environments. This beefy scrubber features a steel frame with enhanced ram protection at the side brushes. A new drive engine with a 6.2 mph cleaning speed and dual vacuum motors results in better suction and drying, saving time and providing increased productivity. The 39 to 47-inch cleaning path uses cylindrical brushes strong enough to remove stubborn, heavy soils from floors. The B 260 RI features our next generation squeegee with resilient Linatex blades designed for safe, long-term use in industrial settings. Additional features include an auto-fill system, stainless steel floater protection and dirt tray, and a water spray hose as standard. The large diameter tank hose makes it quick and easy to empty, and it also has standard and side brush working lights for safety. The operator will find a comfortable seating area with a simple-to-use control panel and large display for clear overview of all functions and parameter settings. If you need a rugged scrubber capable of handling large cleaning tasks, the B 260 RI is for you!

1 6.2 mph cleaning speed

- Enables high area performance in a time-saving operation with more productivity.
- Utmost driver safety with automated speed regulation in turns.

2 Anti-corrosion industrial squeegee built to last

- Tear-resistant, long-lasting Linatex® squeegee blades for excellent drying results.
- Fast and simple tool-free replacement of the blades.
- Ergonomic handles in center of the assembly with quick release.
- Parabolic design helps channel water to the recovery point.

3 Simple controls and LCD displays

- Single dial to select mode of operation is intuitive and makes for easy training.
- Check power, pump, brush motor, vacuum motor, and reverse operation at a glance.
- Screen displays machine status, fault alerts, and service intervals.

4 Newly developed roller brush deck

- Robust steel housing for maximum strength and durability.
- Rollers can be changed in a matter of seconds without tools.
- Roller brush provides excellent cleaning results with 7 times the contact pressure compared to disc technology.

5 Includes two turbines as standard

- Excellent scrubbing results on all surfaces.
- Wear-free Ec vacuum motors. Optimized airflow with the newly developed squeegee.
